

NOW HIRING | ASSISTANT SUPERINTENDENT #25ASU

At Peak, we pride ourselves on providing large firm capabilities, while maintaining small firm personal commitment and overhead costs. Peak is a progressive employer that offers opportunities to work on unique and exciting projects with established and reputable clients.

We are currently seeking Assistant Superintendents in various locations in Alberta, Ontario and Manitoba.

Summary

The Assistant Superintendent assists and supports Superintendents with field operations. The incumbent may be solely responsible for a specialized or limited area on larger projects, or for general field operations for smaller projects. The Assistant Superintendent supervises self-performed and subcontracted construction work, with a focus on the execution of the work.

Who You Are

You have at least 3 years of related or relevant supervisory experience on active construction projects. Specific project experience should include food processing, distribution, and warehouse facilities with aggressive schedules. Experience in site development of sites between 15 and 100 acres and working in tight urban core environments would also be relevant to this role.

You have high standards for safety and the well-being of all site workers. You have excellent communication skills and work productively with others.

Key Responsibilities

- Communicate consistently with subcontractors, suppliers and field staff the expectations and directions regarding schedules, construction methods, company policies and procedures, permits, safety/loss prevention, quality control, and other performance standards.
- Assist with the review and coordination of the project safety plan.
- Review the submission and revisions of project drawings with subcontractors and other superintendents.
- Assist with the planning and preparation of project execution, inspection, testing and safe work plans.
- Ensure that the project site and company assets are secure and maintain a safe and respectful working environment at all times.
- Enforce safety protocols to maintain a safe work environment.
- Work closely with project managers, clients, and other stakeholders to maintain open communication, anticipate challenges, and meet project requirements
- Manage resources effectively, including labor, materials, and equipment.
- Ensure adherence to local building codes and regulations

Skills & Qualifications Required

- 3+ years of experience in a supervisory capacity. Depending on the project size, scope, and complexity the years of experience may vary.
- Fundamental knowledge of construction disciplines, cost control, scheduling, safety regulations and engineering required.
- Proficient in Microsoft Office applications
- Skilled Trade Certification is an asset
- Highly developed communication and interpersonal skills with an ability to communicate at all levels
- Ability to travel is an asset
